MATERIAL SAFETY DATA SHEET

GLIDE TECHNOLOGY SDN BHD (759475-T)

NO 1,BLOK F,JALAN SAUJANA INDAH 10,TAMAN PERINDUSTRIAN SAUJANA INDAH, TAMAN TTDI JAYA,SEKSYEN U2,40150,SHAH ALAM,SELANGOR.

1- IDENTIFICATION

: GLIDE MAXIGLIDE ENGINE OIL SAE 5W-40

2- COMPOSITION

Product Name

Additivated Lubricating Oil: Complex combinations of hydrocarbons obtained (from vacuum distillation) by solvent extraction and dewaxing processes; mainly consisting of saturated hydrocarbons having carbon numbers C_{15} - C_{50} and special additive package incorporated in small quantity.

3- HAZARDS

Human:

Inhalation - Short-term exposures to vapors and oil mists cause irritation of the respiratory tract. Long-term exposures can cause lung fibrosis preceded by broncho-pulmonary symptoms in concentrations over 5 mg/m³ (TLV).

Ingestion - Low oral toxicity: toxicity by ingestion: Grade O; LD 50 > 15g/Kg (oral-rat). Intestinal absorption is very low. Accidental intake of large amounts causes irritation of the gastrointestinal tract, nausea, vomiting and diarrhea.

Contact/Skin - Low skin toxicity: LD 50 > 5g/Kg (rat), level considered to be harmless in short-term exposures. Long-term exposures produce smarting, redness, irritation and dermatitis due to defatting of the keratyn layer. No skin sensitization has been registered in animal tests or human cases.

Eyes - Repeated exposure to vapors or liquid cause irritation.

Environment: Combustible. Lighter than water; it can obstruct sewers and water intakes.

: Flush with plenty of soap and water
: Flush with plenty of water for at least 15 minutes.
: Do not induce vomiting. If conscious, have the victim drink Water or milk.
: Remove the victim to fresh air; administer oxygen if Necessary. Call for medical attention.
: Foams, dry chemicals, CO ₂ , nylons and powders
: Foams, dry chemicals, CO ₂ , nylons and powders : Water, may be ineffective
: Water, may be ineffective : Heat resistant suit and gloves. Self-contained breathing
: Water, may be ineffective : Heat resistant suit and gloves. Self-contained breathing apparatus.

6- ACCIDENT PRECAUTIONS

Precautions for the Environment:

Hazard of physical fouling to coasts, soils, etc. due to low solubility and high viscosity of the oils. Avoid the material entering water intakes.

Clean-up Method:

Treat as an accidental oil spill or leak; avoid dispersion of the material with mechanical barriers. Remove with physical or chemical treatment.

Personal Precautions	: Avoid prolonged contact with contaminated clothes or with the product
Personal Protection	: Gloves and goggles or face shield

7- STORAGE AND HANDLING

Handling:	: Avoid prolonged contact and inhalation of mists and vapors
General Precautions	From heated oils
Specific Conditions	: Safety goggles and gloves should be used
Storage: Storage Conditions	: Containers properly labeled and sealed, placed in cool and Well ventilated areas
Incompatible Materials	: Strong oxidants
Dangerous Practices	: NP

8- PERSONAL PROTECTION

Inhalation

Low vapor pressures: The product is slightly volatile at room temperature and does not present special risks. In presence of heated oils, wear protective masks to avoid vapor inhalation.

Skin Eye Other Specific Hygiene Measures	 Gloves Safety goggles Showers and eye-washers in the working area. Good work practices to minimize exposure and adoption of good Personal hygiene measures avoid the presence of skin rash and oil Acne
Exposure Controls	: TLV (typical base oil) = 0.016 PPM at 20°C (saturated vapor Concentration); TLV/TWA (ACGIH) = 5mg/m ³ (oil mist); TLV/STEL (ACGIH) = 10mg/m ³ (oil mist

9- PHYSICAL AND CHEMICAL PROPERTIES

Specific Gravity (at 15° C)	: 0.89
Flash Point	: 210° C
Explosive Properties	: NP
Oxidizing Properties	: NP
Water Solubility	: Insoluble (100 PPM max. H ₂ O)
Solubility	: Organic solvents

10- STABILITY AND REACTIVITY

Polymerization Risk:Materials to Avoid:Hazardous Decomposition Products:	Stable at room temperature NP Strong oxidants react with oils and organic materials NP Exposure to open flames
--	--

11- TOXICOLOGICAL INFORMATION

Routes of Exposure	: Contact with skin, eves and inhalation. Ingestion is not
	Frequent.
Acute and chronic Effects	: No malignant acute effects are known. Chronic effects due To repeated exposures are irritation, dermatitis and acne.
Carcinogenicity	: NP
Reproductive Toxicity	: No evidences
Medical Conditions which Increase	
Hazard to Exposure	: Respiratory tract deficiencies and dermatological problems

12- ECOLOGICAL INFORMATION

Pollutant Potential:

Persistence and Degradability- the material is oily and viscous and floats on water. It presents a high physical fouling potential, mainly in sea-spills; by contact, destroys small acuatic organisms and makes living difficult for upper organisms, not allowing the sunlight to reach underlying marine ecosystems, affecting its normal development.

Mobility/Bioaccumulative Potential- it does not present bioaccumulative problems in living organisms or incidence in the tropic food chain, although it may cause long-term adverse effects in the acuatic environment, due to its high physical fouling potential.

Eco toxicological Effect:

Dangerous for acuatic life in high concentrations (spills).

13- DISPOSAL

Disposal (waste)	Ius) : Recycling and recovery of base oils when possible : Only in specific prepared and controlled areas. Avoid releasingoils to sewers because they can destroy water treatment plantMicroorganisms. Do not attempt to clean containers sinceresidue is difficult to remove; dispose in a safe way.
Handling (waste)	: Labeled and sealed containers. Avoid direct contact with wasteoils.
14- TRANSPORTATION	
Special Precautions	: Stable at room temperature and during transport. Store in

	C
UN Number	: NI
ADR (TPC)/RID (TPF) Classification	: -
IATA-DER Classification	: -
IMDG Classification	: -

: Stable at room temperature and during transport. Store in Cool well ventilated areas. : NP
